

Sprint 1 Plan
Small Job Finder (EzWork)
Team.cry()
1/22/2018 to 2/2/2018

Goals

- Familiarize team members with languages we will use
- Create some simple web pages for EzWork
- Build the database foundation for user logins and profiles

User Stories

- As developers we want to familiarize ourselves with HTML, CSS, JavaScript for the front-end of the product and FireBase for back-end (not limited to listed languages)
 - Learning basics of HTML/CSS/JavaScript {8 hours per member}
 - Learning basics of FireBase {8 hours per member}
- As a user, I want to be able to visit a home page for SJF
 - Design the layout of the homepage {2 hours}
 - Design a Logo {1 hours}
 - Code page according to layout {6 hours}
- As a user, I want to be able to see a sample job posting page for SJF
 - Design layout of a job posting {2 hours}
 - Code page according to layout {6 hours}
- As a user, I want to be able to create an account, which would be as either an employer or finder
 - Design layout of Sign Up page {1 hours}
 - Code page according to layout {2 hours}
 - Store created accounts in database when created as employer/finder {2 hours}

Total for User Stories: 70 Hours

Team Roles

- Daniel: Front end designer and coder

- Jeff: Back end coder and graphic design
- Javier: Front end designer and coder
- Ben: Front end designer and coder
