Goals

- Make user profiles include photos and files
- Add search/ordering to job listings
- Add a page to manage Applications
- Add a page to manage posted Jobs
- Debug Website

User Stories

- As a finder, I would like to be able to customize an account-bound profile with personal information
  - Include photo with profile
  - Include uploadable resume with profile
- As an employer, I would like to be able to respond to applications
  - Option to reject/accept individual applications
  - Include contact information with Acceptances
  - Option to delete/remove Job Postings
- As a user, I would like to be able to sort the job post by various tags/keywords
  - Implement tag system for job postings
  - Implement some form of string-based search algorithm over titles/descriptions
- As a finder, I would like to be able to view the status of my job applications
  - Page for listing applications
  - Divide into Open/Accepted/Rejected
  - Option to remove/cancel any applications
  - Include Contact Info in Accepted applications

- As a user, I want every page to be aesthetically pleasing and have a consistent layout/color scheme
