High Level Goals
- Be able to create an account as either job finder or employer
- Be able to find local jobs posted by job listers by search or distance
- Be able to customize customized profiles with photos and a resume for job finders
- Be able to post jobs as an employer
- Be able to apply for jobs as a finder, including chosen personal info
- Be able to accept/decline job applicants as an employer

User Stories Implemented
- As a user, I want to be able to create a profile as either a finder or an employer
- As a user, I want to be able to customize a profile with a photo, location, contact information, and bio
- As a finder, I want to be able to include a resume with my profile
- As an employer, I want to be able to post jobs with title, description, type, and location
- As a user, I want to see a list of all posted jobs on the home page
- As a user, I want to be able to search the posted jobs using keywords
- As a finder, I want to automatically see jobs sorted by distance from my location, provided on my profile
- As a finder, I want to be able to apply to a given job from the list
- As a finder, I want my application to automatically include information from my profile that I choose
- As a finder, I want to be able to view the status of all my applications so I can tell if they are accepted, rejected, or not yet decided
- As an employer, I want to view all applicants listed under the job they are applying to

- As an employer, I want to be able to reject or accept a given application
- As an employer, I want to be able to delete a job listing, automatically rejecting all undecided applicants
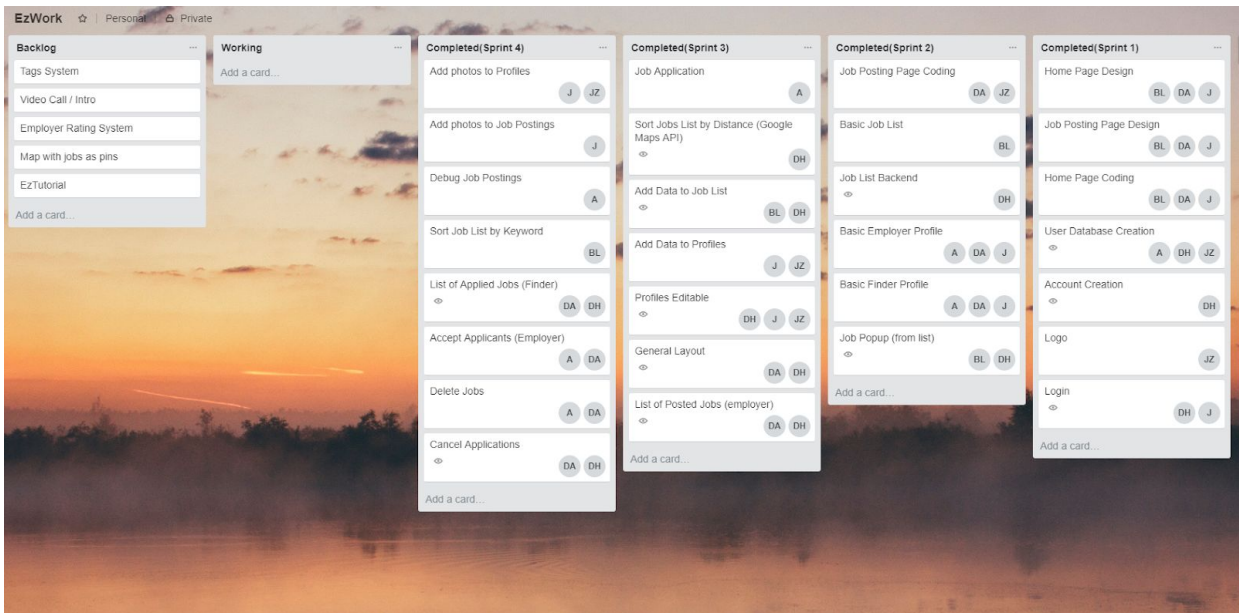

Product Backlog
- As a finder, I would like to be able to search for jobs using a tags system
- As an employer, I would like to be able to add tags to my job posting from a predefined list
- As an employer, be able to interview and visually connect with job finders via video call
- As a finder, be able to view jobs on a map to determine distance and working feasibility
- As a finder, I would like to be able to rate employers who I worked for and view employer ratings
- As a user, I would like to be able to explore a tutorial of the EzWork website

Known Bugs/Issues
- Usernames cannot include . or / characters
- Inputting HTML code directly into Profile/Job Input boxes causes undefined behavior
- About/Contact Us/Adv Search(tags)/Tutorial buttons do nothing, see backlog
- Users may input anything of email format (x@y.z) as their email, no verification/validation of proper email
