Sprint 3 Plan
Small Job Finder (EzWork)
Team.cry()
2/20/2018 to 3/2/2018

Goals
- Make user profiles customizable
- Add search/ordering to job listings
- Add ability to apply for/select applicants for Job Postings
- Make overall site more aesthetically pleasing

User Stories
- As a finder, I would like to be able to customize an account-bound profile with personal information
    - Allow user to modify their own profile page
    - Update database with modified info
    - Include photo with profile
    - Include uploadable resume with profile
    - Specify which portions of profile are visible in application?
- As an employer, I would like to be able to customize an account-bound profile with location and contact information
    - Allow user to modify their own profile page
    - Update database with modified info
    - Include multiple photos with profile
- As an employer, I would like to be able to view my posted jobs and applications
    - Create a page for posted jobs
    - Display applicants for each posted jobs
- As a user, I would like to see a list of job postings on the home page
    - Display list of snippets for each job
        - Title, Employer, Distance, Type, Pay, Picture, Posted?

- As a user, I would like to be able to sort the job post by various tags/keywords
  - Implement tag system for job postings
  - Implement some form of string-based search algorithm over titles/descriptions
- As a finder, I would like to be able to apply for a job posting
  - Allow user to select profile information to include in application
  - Add application/info to some form of db
- As a user, I would like to be able to see my distance from each job posting
  - Use google maps API to calculate distance from user's profile-listed location to job location
- As a user, I want every page to be aesthetically pleasing and have a consistent layout/color scheme
